

Welcome to Pragya's Gurukul

Pragya's Gurukul promotes convergence of traditional values with modern systems. We recognize each student as an individual, made in the image of God, and we understand that education should foster self-respect & self-worth alongwith respect & esteem for others.

It is believed that a person's sense of self is built through a set of associations between things in the external world and ideas in the mind. These associations, formed in early childhood, are nearly irreversible. It is the obligation of our enterprise these associations be developed with care.

We strive to provide an environment where the unique gifts of intellect, personality, stature and spirit are given the best opportunities to bloom and flourish. We are seriously concerned about moulding children into people of good moral character & habits. The depth and breadth of our educational programme will help students identify and communicate clearly defined personal values and practice them in daily decision making.

Our institution helps groom the young mind, in a healthy & encouraging environment. Our cocoon, is full of warmth, and serves as a launching pad for the further leap into formal education. After a brief training, youngsters leave our premises fully armed with all the necessary weaponry to face the next phase of an increasingly competitive world. It is attempted, to the best of our ability, to prepare our wards to face the future with confidence and humility.

We intend to groom leaders of global community, individuals who are experts in their field and serve their community and nation through meaningful social contribution.
